

White Pages Connect

Take one step to be everywhere

Instantly update your business details across the most relevant search engines, websites, social platforms, apps and maps – everywhere your customers are looking.

Be everywhere

Control your presence across more than 30 platforms, including Google, Facebook and Apple Maps.

Rich and accurate information

Make sure customers are given the most comprehensive and correct business details, no matter where they search.

Total control

Our integrated dashboard lets you control, manage and analyse all location data, in one place.

Are your online business details a mess?

85% of business listings online are either inaccurate or have missing details.

Total control with White Pages Connect

With a comprehensive suite of features for businesses of any size, you can now reach customers like never before.

Google API

Manage your data on Google My Business and Google Maps in real-time to reach more customers with correct information — and we help you with your current Google setup.

Facebook Location Pages

Add location pages and a store locator to your Facebook page — we create and claim these pages for you, also helping connect existing location pages to your Facebook account.

Real-time updates

Control your content for each location, in real-time. Whether you're updating opening hours, moving locations or changing phone numbers, we've got you covered.

Duplicate suppression

See existing duplicate listings disappear as White Pages Connect continuously searches for and suppresses such listings on partner platforms, boosting your local SEO across Google and Bing.

Multi-location

Whether you have one or one thousand stores, you can easily update each location across 30+ platforms.

Reporting

Understand and track the performance of all your locations across each platform, in a single reporting interface.

Customised locations

Manage and schedule content for each location, anywhere in Australia.

Profile protection

Enjoy continuous listings protection. White Pages Connect perpetually secures the highest level of data consistency, bolstering your location rankings on search engines.
